THE WARNER ELECTRIC ADVANTAGE

Warner Electric is a global leader in developing innovative electromagnetic clutch and brake solutions. Warner Electric engineers utilize the latest materials and manufacturing technologies to design long-life and easy-to-use clutches and brakes for improved accuracy and reliability. We pride ourselves on customer service. With employees based around the world, we are able to design, manufacture, and quickly deliver high-quality products across various global locations.

We manufacture a full line of products to solve your motion control needs: -power-on and spring-applied friction clutches and brakes, motor brakes, controls, and moment of inertia measuring equipment.

Warner Electric engineers excel in customizing solutions that meet our OEM's unique needs. Each of our standard catalog clutches and brakes can be adapted to meet a wide variety of applications. Put our engineering to the test and contact Warner Electric today!

At Warner Electric, we provide solutions!

SPRING-APPLIED ELECTRICALLY RELEASED ERX SLIM BRAKES

- Torque range from 5 to 75 Nm
- Single brake
- Easy installation
- Indoor application
- Non-Sticking friction material
- CE / UL / CSA Approved

Applications

Wind Turbines

Industrial Motors

Cranes

Chain Hoists

FEATURES

The ERX Slim is a spring-applied, power-off electromagnetic brake range designed for parking and holding applications. The design also offers emergency stop capabilities.

With our three friction material options, the ERX Slim brake can be configured to meet specific application requirements, e.g., speed, energy, or torque. Several other options are available to customize the brake design for specific applications.

Voltage	Single voltage as standard (24V, 103.5V, 180V, 207V, 225V)
Magnet Insulation	Class F – 155°C
Ambient Temperature Range	-25 to 40°C
Duty Cycle	100% energized
Torque Range	5 to 75 Nm
Options	Hand lever release, dust cover, and flange or a combination
Certifications	CE / UL / CSA approved
Note	<ul style="list-style-type: none"> • For dry use • Indoor application • Non-Sticking friction material

Images depict examples of configurations. Please refer to configurator on page 7 to define your required version or contact Warner Electric.

Applications

Wind Turbines

Industrial Motors

Cranes

Chain Hoists

FRICTION MATERIAL TORQUE DATA

Monobloc Friction (ST)

Monobloc	Torque up to speed *		Max energy allowed per braking up to speed [Joule]
	[Nm]	[rpm]	
ERX 5	5	5000	2000
ERX 10	10	3500	3000
ERX 20	20	2500	4000
ERX 35	35	2000	8000
ERX 60	60	2000	12000

High Torque Friction (HT)

Monobloc	Torque up to speed *		Max energy allowed per braking up to speed [Joule]
	[Nm]	[rpm]	
ERX 5	8	2500	3000
ERX 10	15	2000	5000
ERX 20	30	1700	8000
ERX 35	50	1400	12000
ERX 60	75	1200	16000

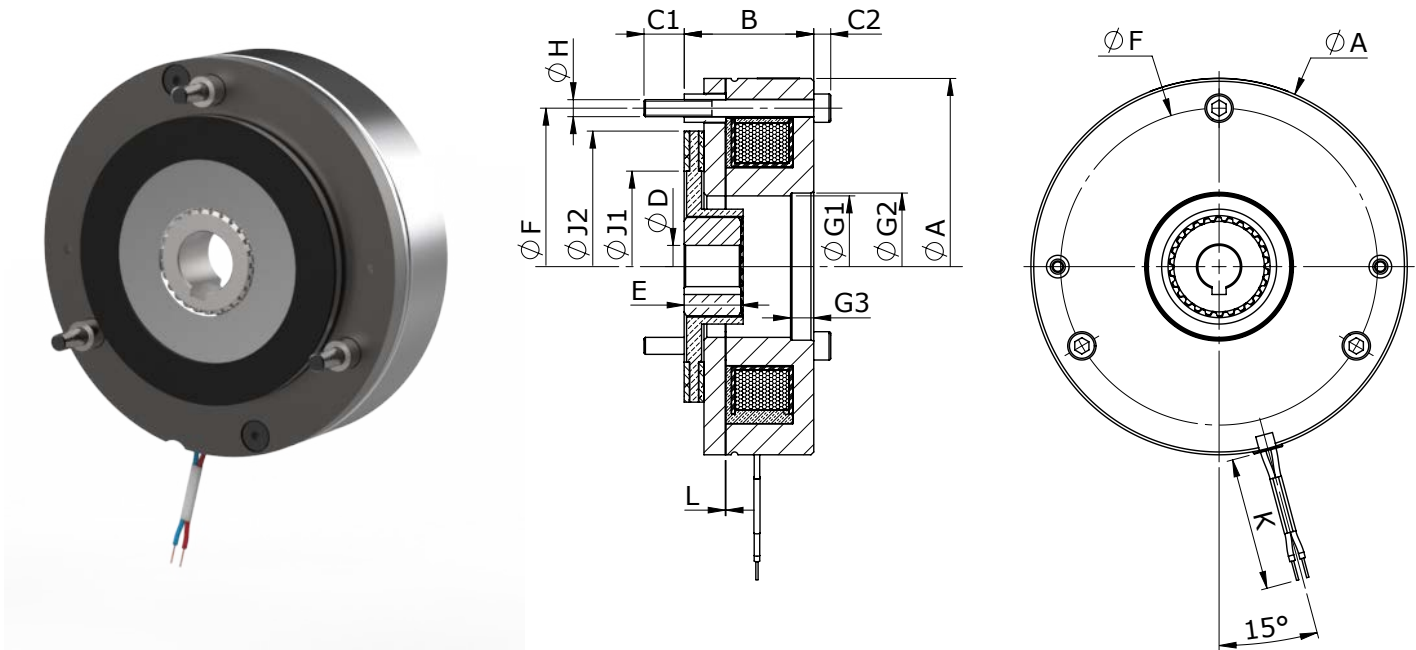

High Energy Friction (HS)

Monobloc	Torque up to speed *		Max energy allowed per braking up to speed [Joule]
	[Nm]	[rpm]	
ERX 5	5	7000	800
ERX 10	10	5500	1200
ERX 20	20	4600	2000
ERX 35	35	3800	3500
ERX 60	60	3500	5000

* Please contact us if the speed of your application exceeds the specified speed. Our engineers will find a solution for you.
